

# SPECIAL ANNEALED BALING WIRE

After extensive industry trials Whites Wires Australia is pleased to offer a range of high quality **special annealed baling wire** at the right price.

## Using wire that works

Wire used in mechanical baling operations is subject to forces not normally associated with other wire applications. The stresses put on the wire when tied mechanically and the loads which it must handle when creating bales makes it far from being the average wire used in fencing or general tying applications.

If a wire is to perform well through a variety of machines and load types, it must meet a number of requirements. The most important of these are:

- Correct elongation;
- Controlled tensile strength; and
- Smooth oiled finish.

Our products are produced to Australian specifications and are tested regularly for elongation and tensile strength. These two factors, above all, are important in minimising wire breakage when tying bales under load. The wire has a lightly oiled smooth finish ensuring that it runs cleanly through the dies and reduces machine wear.

## About Whites Wires

Whites Wires Australia is an Australian-owned family company which has supplied wire products for over 30 years and is a well recognised wire specialist. Branches in Sydney, Melbourne, Brisbane, Townsville, Perth and Adelaide guarantee stock is available at each site.

CODE	DESCRIPTION
29 532	3.15mm x 600m coil
29 526	2.64mm x 950m coil

Supplied in cartons:  
pallet lots of 27 cartons

CODE	DESCRIPTION
29 631	3.15mm x 800kg
29 634	2.64mm x 800kg

Supplied on stems ready for use
